**LEADERS  
IN BIOTECHNOLOGY  
PRODUCTS**

Every year without exception, Atomes registers several breakthroughs, adding more patents to its already impressive list of "unique-patented" products. In this respect, Atomes has succeeded in developing eco-friendly products all-while being extremely effective and economic. This is in part due to the highly-concentrated nature, multi-active ingredient and unique formula composition that allow multi-purpose applications by the same product.

Quality Control at Atomes is a permanent process aimed at positioning the company above the standards of the industry with respect to formulation, manufacturing, distribution and after-sales service. All aspects of product design, ranging from raw materials to commercialization, are rigorously controlled in order to exceed the prevailing technical standards, attain superior application performance, abide by current regulations and fulfill Atomes environment mission.

Our team consists of highly-trained doctors, engineers, and technicians having substantial hands-on experience and operating within a framework of professionalism, integrity, and goal-oriented management. Our team and our advanced information technology infrastructure constitute the backbone of our added-value sales and after-sale (technical support) services.

Atomes supports Green Chemistry. Its products are exclusively biodegradable, environment friendly, non-toxic, non-carcinogenic, non-corrosive, non-harsh and safe to handle.

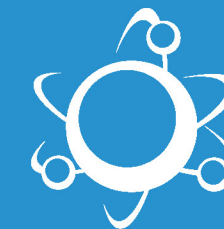

Part of our R&D partners of the following private and government institutions:

In Many  
**Industry Sectors** »

## A Variety Of Markets

In partnership with prestigious universities and research centres, Atomes can thus fully realize its mission of innovation. The pace of development and continuous improvement of its products allows Atomes to rapidly renew its product lines and thus maintain a major technological edge. For example, Atomes has approved more than 60 new products from Health Canada, Agriculture Canada & Canadian Food Inspection Agency CFIA over the past four years. The reputation of Atomes in innovation and solution-providing has attracted many customers even at the governmental level.

### The company serves the following industries

- Animal Healthcare and Pharmaceuticals.
- Hotel, Commercial and residential.
- Water & Wastewater treatment.
- Food & Beverages Processing.
- Aerospace and military.
- Pulp & paper.
- Agriculture.
- Petroleum.
- Construction.

## THE HISTORY Of Atomes

Atomes is a Canadian company founded in 1999 by a team of scientists. These professional industrial chemists and Microbiologists have applied their technical knowledge and expertise to the development of products that satisfy the growing needs in several Divisions such as public hygiene, Animal Health, Pulp & Paper, Agriculture, Petroleum, Food & Beverage, Aerospace & Military etc. They believed that more stringent methods in Biotechnology would improve public health protection. Atomes' founders successfully laid the foundations of a dynamic company, an innovator in the field of Biotechnology products and related services.

Atomes focuses on a single goal: to continuously improve the quality of the environment where our fellow citizens live, work, play, study and receive medical care, with a view to pushing back the frontiers of longevity while respecting the environment.
